

Dear 2A parents,

Today I became aware of a possible COVID-19 exposure situation that may affect some members of 2A. I have been in touch with Dr. Sherry Young at the Health Department who has told me that the classroom can remain open. Dr. Young has advised us that there is no need for any additional action to be taken in the classroom. Communications with families who may have been directly affected have already occurred. Currently, no one in the classroom has tested positive for COVID-19.

We will continue with the rigorous safety protocols (mask wearing, hand sanitization, temperature checks, social distancing, and cleaning) we have in place.

We have been unwavering in our safety procedures and I am grateful that the school community has been supportive of these processes. Open communication in our community will be vital as we navigate learning in the time of COVID-19.

I know it is a relief for many to be back in the school building for learning. We must remain diligent about safety practices, both in school and out of school, so that we remain healthy and able to attend school. Please keep all people affected by the virus in your prayers and contact me with any questions.

With love,

Susan Malinoski
